PROFESSIONAL SUMMARY

Senior Android Engineer and Mobile Team Lead with 8+ years of experience developing scalable, high-performance mobile applications using Kotlin, Java, and Jetpack Compose. Specialized in MVVM, MVI, Clean Architecture, and Android Architecture Components, with strong expertise in Kotlin Coroutines, Flow, RESTful APIs, and CI/CD pipelines. Experienced in Dependency Injection (Hilt, Dagger), performance optimization, and modular architecture. Proven track record in achieving 95%+ crash-free rate and leading cross-functional teams to deliver production-grade applications in fintech and loyalty platforms.

TECHNICAL SKILLS

Languages: Kotlin, Java, Swift, Dart

Android Development: Android SDK, Jetpack Compose, XML, Android Architecture Components

Architecture & Patterns: MVVM, MVI, Clean Architecture, Modular Architecture, Design Patterns

Asynchronous Programming: Kotlin Coroutines, Flow, RxJava

Dependency Injection: Hilt, Dagger

Frameworks: Flutter, SwiftUI, UIKit

Tools & CI/CD: Git, Firebase, Fastlane, CI/CD Pipelines, Gradle (KTS), Azure DevOps

APIs & Data: RESTful APIs, JSON, Room, SQLite, Core Data

Testing: Unit Testing, JUnit, Espresso, Mockito

Performance & Security: Performance Optimization, ANR Handling, Memory Profiling, Biometric Authentication, Encryption

Methodologies: Agile, Scrum

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer

Dsquares (Global Loyalty Experts) – Cairo, Egypt | 2025 – Present

- Developed scalable fintech loyalty applications using Flutter and Clean Architecture, supporting production-level usage
- Enhanced SDK modularization and reusability using modular architecture and dependency injection principles
- Collaborated with cross-functional teams to deliver high-quality production-grade applications
- Improved SDK performance and integration efficiency across multiple clients, reducing integration complexity and development time

Mobile Team Lead / Android Lead / Senior Android Developer

EXAS2030 (qTech Al Qemam) – Cairo, Egypt | 2020 – 2025

- Mobile Team Lead**
 - Led Android and Flutter teams, increasing productivity by 25%
 - Reduced delivery timelines by 30% using CI/CD pipelines
 - Aligned scalable architecture solutions with business goals
- Android Team Lead**
 - Managed Android development lifecycle using MVVM, MVI, and Clean Architecture
 - Introduced best practices, improving code quality and reducing defects
 - Mentored developers and conducted code reviews
- Senior Android Developer**
 - Developed high-traffic Android applications using MVVM, MVI, Clean Architecture, and Android Architecture Components
 - Implemented RESTful APIs and optimized performance using Kotlin Coroutines and Android Architecture Components (ViewModel, LiveData)
 - Applied dependency injection (Hilt/Dagger) and modular architecture for scalability

Senior Android Developer / Mid-Level Android Developer

Smart Integrated Solutions – Cairo, Egypt | 2018 – 2020

- Implemented MVVM architecture and Android Architecture Components, improving maintainability and scalability
- Built CI/CD pipelines, reducing deployment issues by 50%
- Developed features using Kotlin, Retrofit, RxJava, and RESTful APIs
- Improved application performance and responsiveness

Freelance iOS Developer – Cairo, Egypt | 2016 – Present

- Developed iOS applications using Swift, UIKit, and SwiftUI
- Improved performance by up to **35%**
- Conducted code reviews and mentored developers

Freelance Android Developer – Cairo, Egypt | 2016 – 2018

- Delivered custom Android apps for multiple clients
- Optimized performance and user experience

PROJECTS & PRODUCTS

- **HSBC Deals (Flutter – Loyalty Platform)**
 - Developed a scalable loyalty and rewards platform (**integrated with fintech systems**) enabling users to redeem points for offers and cashback
 - Implemented using BLoC, GetX, Modular Architecture, and Clean Architecture
- **Stars Group Loyalty SDK (Android – Jetpack Compose)**
 - Developed a modular Android SDK using Jetpack Compose, MVI, Clean Architecture, and reusable UI components
 - Enhanced scalability and maintainability through modular architecture
- **Mobilawy Consumer SDK (Android)**
 - Migrated legacy UI to modern architecture using MVVM, Data Binding, and dependency injection principles
 - Improved performance, scalability, and maintainability
- **qAuth Attendance (Android & Flutter)**
 - Developed biometric-based attendance system using Jetpack Compose and Flutter (BLoC)
 - Applied Clean Architecture and performance optimization techniques
- **qPMOP (Android & iOS)**
 - Employee and contractor management systems using **MVVM (Android) and VIPER (iOS)**
- **Amar Tick Platform (Android)**
 - E-commerce apps with **STC payment integration** using **MVVM**
- **ALKhalil Systems (Android)**
 - Internal management systems using **MVVM and REST APIs**
- **Smart Schools (Android – 20K+ Downloads)**
 - QR scanning, Maps, Zoom SDK, Firebase
- **Alaam Rakmy (Android – Media App)**
 - Advanced media playback features
- **Klsh Platform (iOS – Client & Provider)**
 - Real-time apps with Maps & Pusher
- **RoknEltayb & Zaheed (iOS – E-commerce)**
 - Built using **MVVM and Clean Architecture**
- **Ghediouh (Flutter – Group Ordering)**
 - Shared ordering and cost calculation system

KEY ACHIEVEMENTS

- Achieved **95%+ crash-free rate** across production apps
- Reduced app load time by **40%** (EXAS2030 Achiever Award)
- Reduced deployment errors by **50%** using CI/CD
- Improved team productivity by **25%**

EDUCATION

- **Bachelor’s Degree in Management Information Systems**
Advanced Academy – Cairo, Egypt (2011 – 2015)

CERTIFICATIONS

- Advanced Android Development
- Configuration Management (SECC – ITIDA)
- Jira for Scrum Masters & Product Owners

LANGUAGES

- Arabic: Native
- English: Professional Working Proficiency
